

December 19, 2010

To Whom it May Concern:

It is my pleasure to write on behalf of Dr. Bhaskar Sharma who has worked in my research group (NSF Center for Biocatalysis and Bioprocessing of Macromolecules, Polytechnic institute of NYU) as a Postdoctoral Researcher for a period of 4 years 5 months (from Sept 1, 2005 to Jan 31, 2010).

During his tenure he was actively involved in many industrial funded projects that include synthesis of novel monomers, macromers and polymers, preparation of biobased polyurethanes, synthesis of silicone-based polymers, development of bioresorbable elastomers, and many more.

While working in my research group, He helped in supervising PhD, master, undergraduate and high school students providing them with valuable hands-on research experiences.

I found him active and confident in whatever task/project I had assigned him. He is professionally sound, hard-working, reliable, a team player, and has the ability to take initiative on tasks which had been helpful in the advancement of our organization.

I wish him all the best in his future endeavors.

Sincerely yours,

Richard A. Gross
