# PHARMACEUTICS (MPH) FIRST SEMESTER

#### MASTER OF PHARMACY

# M.PHARM. FIRST SEMESTER PAPER I: MODERN RESEARCH METHODS (THEORY)

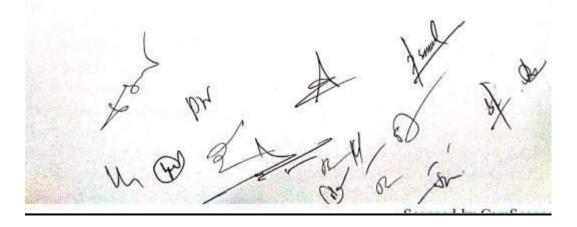

(4 hrs/week)

All topics will include instrumentation methodologies, techniques and applications to structural and quantitative analysis of drug and their methodologies.

Content	Credit
Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC.	12
Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy	20
	6
	4
Statistical treatment of data, test for significance, analysis of variance, multivarient statistics.	6
	Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC. Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy and plasma emission spectroscopy, electron microscopy. Radio assaying, radioimmuno assaying and autoradiography. Computer aids in pharmaceutical analysis Statistical treatment of data, test for significance, analysis of variance,

## **Books Recommended:**

- 1. J.R. Dyer, Application of absorption spectroscopy.
- 2. Nakanishi, Infrared absorption spectroscopy.
- 3. William Kemp, Organic spectroscopy.
- 4. P.S. Kalsi, Spectroscopy of organic compounds.
- 5. Silverstein and Bassler, Spectroscopy of organic compounds.
- Dudley William, Ian Flemming, Spectroscopic methods in organic chemistry, Tata McGraw Hill.
- 7. Williard, Merrit, Dean, Instrumental methods of analysis.

Courses Focus on Employability/Entrepreneurship/Skill Development

## गुरू घासीदास विश्वविद्यालय (हेदेर रिसरिवाल अधिम 2008 ह. 25 हे संगंत साथि हेईप रिवरिवाल) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

Practical No.	Content	Credit
1.	To estimate the given sample of aspirin using UV spectroscopic method.	2
2.	To find out the effect of substituent in the absorption spectra of benzoic acid.	2
3.	To estimate the concentration of given sample of aspirin by colorimetric method.	2
4.	To estimate the given sample of ascorbic acid using visible spectroscopic method.	2
5.	To determine the percentage of acetyl salicylic acid in the given sample using back titration method.	2
6.	To determine the content of metronidazole in the given sample using UV spectroscopic method.	2
7.	To determine the total hardness of water of the given sample.	2
8.	To separate and identify the given amino acids using ascending paper chromatography.	2
9.	To study the kinetics of aspirin hydrolysis using visible spectrophotometric method.	2
10.	To separate and identify the given samples using thin layer chromatography.	2
11.	To perform the estimation of paracetamol using visible spectroscopic method.	2
12.	To determine the content of paracetamol in the given sample using UV spectroscopic method.	2

- J.R. Dyer, Application of absorption spectroscopy.
- 2. Nakanishi, Infrared absorption spectroscopy.
- 3. William Kemp, Organic spectroscopy.
- 4. P.S. Kalsi, Spectroscopy of organic compounds.
- 5. Silverstein and Bassler, Spectroscopy of organic compounds.
- Dudley William, Ian Flemming, Spectroscopic methods in organic chemistry, Tata McGraw Hill.
- Williard, Merrit, Dean, Instrumental methods of analysis.

## गुरू घासीदास विश्वविद्यालय (हेदेर विसविवास अधिनम 2008 ह. 25 हे संतर्भत साहिर हेईद विवविवास) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

[ D	nit Content	Credit
T	<ol> <li>Introduction: Biotechnology as an interdisciplinary area, traditional and modern biotechnology, technologies used in bistechnology, global impact of biotechnology on healthcare.</li> </ol>	04
	2. Recombinant DNA technology: Physical and chemical nature of DNA, DNA replication in prokaryotes and enterpotes, tools and techniques of genetic engineering, aite directed mataganesis, polymerase chain reaction and analysis of DNA sequences, gene library, advantages of producing biotechnological products by recombinant means, plants and transgenic animals as potential acurees of recombinant biotechnological products, typical opstream and downstream process, product recevery, concentration and chromatingniphic purification, product stabilization and formulation, chromatingniphic purification, product stabilization and formulation, chromatingniphic purification, product stabilization and formulation, chromating process, establishing purity and safety.	12
3.	and the second s	05
4.	Gene therapy: Brief concept, gene delivery by viral and non viral vectors, applications in treatment of stagle gene disorders such as cystic fibrasis, ADA etc.	05
5.	Immunology and immunological preparation: Introduction to immunology, antigen natibodies, cells and organs of immune system, active and passive immunity, intigen antibody reactions and their applications, hypersensitivity, immunological tolerance, classification of immunologicals, typical manufacture techniques for vaccines and antisera, preparations, standardization and storage, objuvants and their application in vaccine design, new generation vaccines such as sub- unit vaccines, DNA vaccines etc.	13
	Hybridoma technology: Formation and selection of hybrid cells, principles and productions of meoordanal intibodies, commercial, production, characterization, quality control and storage of monoclonal antibodies, advantages and applications of monoclonal antibodies.	0
	Enzyme technology: Different techniques of immobilization of enzymes and whole cells, advantages and disadvantages of immobilization, kinetics of immobilized enzymes, applications and future of immobilized enzyme technology.	0

- 1. D.J.A. Crommelin, R.D. Sindelar, Pharmaceutical biotechnology, Taylor and Francis.
- 2. M.G. Grooves, Pharmaceutical biotechnology, Taylor and Francis.
- G. Walsh, Pharmaceutical biotechnology Concepts and applications, Willey Interscience Ltd.
- 4. S.P. Vyas and V.K. Dxit, Pharmaceutical biotechnology, CBS Publications.

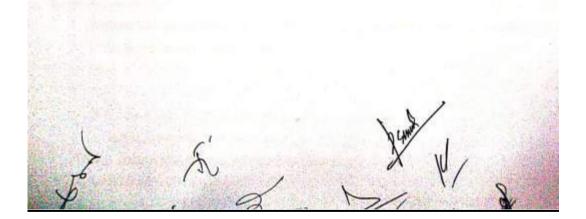

गुरू घासीदास विश्वविद्यालय (हेदेर रिसरिवाल अहिंग्ल 2008 ह. 25 हे संगंत सारित हेन्द्रेर रिस्टीवाल) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ad 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

Practical No.	Content	Credit
1.	Colorimetric estimation of proteins (Biuret/Lowry/Bradford method).	2
2.	Changes in conformation of proteins by viscosity measurement.	2
3.	DNA isolation from onion/spleen/coconut endosperm and its characterization.	2
4.	DNA estimation by Diphenyl amine method.	2
5.	Electrophotetic (paper) separation of plasma proteins.	2
6.	Quantitative precipitation (Antigen-antibody) test.	2
7.	Agglutination (ABO blood group typing) test.	2
8.	Enzyme immobilization in alginate beads and its characterization.	2
9.	Enzyme immobilization by cross linking and its characterization.	2
10.	Solvent/salt precipitation of proteins.	2
11.	Dialysis and concentration of protein solutions.	2
12.	Freeze drying of given protein sample.	2

- 1. D.J.A. Crommelin, R.D. Sindelar, Pharmaceutical biotechnology, Taylor and Francis.
- 2. M.G. Grooves, Pharmaceutical biotechnology, Taylor and Francis.
- G. Walsh, Pharmaceutical biotechnology Concepts and applications, Willey Interscience Ltd.
- 4. S.P. Vyas and V.K. Dxit, Pharmaceutical biotechnology, CBS Publications.

#### MASTER OF PHARMACY

# M.PHARM, FIRST SEMESTER

PAPER III: DRUG REGULATORY AFFAIRS AND QUALITY ASSURANCE (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Requirements of GMP, CGMP, GLP, USFDA, WHO guidelines and ISO 9000 series.	7
2.	Drugs and cosmetics acts and rules, drug regulatory affairs.	5
3.	Documentation: Protocols, forms and maintenance of records in pharmaceutical industry.	3
4.	Preparation of documents for new drug approval and export registration.	3
5.	Processing and its application intellectual property rights (patent, copyright and trade marks).	7
6.	Sewage disposal and pollution control.	3
7.	Concepts in validation, validation of manufacturing, analytical and process validation and its application.	4
8.	Basic concept of quality control and quality assurance systems, source and control of quality variation of raw materials, containers, closures, personnel, environment, etc.	5
9.	In process quality control tests, IPQC problems in pharmaceutical industries.	4
10.	Sampling plans, sampling and characteristic curves.	3
11.	Master formula generation and maintenance, standard operating procedure (SOP) for different dosage forms.	4

#### **Books Recommended:**

- 1. Willing, Tuckerman, Hitching, Good Manufacturing practices for pharmaceuticals.
- 2. Drugs and cosmetics acts and rules.
- 3. Bharathi, Drugs and pharmacy laws in India.
- 4. Patel, Industrial microbiology.
- 5. B.T. Loftus, R.A. Nash, Pharmaceutical process validation.
- 6. S. Bolton, Pharmaceutical statistics.
- 7. G.S. Banker, C.T. Rhodes, Modern pharmaceutics.
- 8. OPPI, Quality assurance.

9. Carletiori, Validation of aseptic pharmaceutical process.

10. Garfield, Quality assurance principles for analytical laboratories.

- 11. Indian pharmacopoeia.
- 12. British pharmacopoeia.
- 13. United State pharmacopoeia.

Courses Focus on Employability/Entrepreneurship/Skill Development

गुरू घासीदास विश्वविद्यालय (हेरी रिसरिवास अभिम 2008 ह. 25 हे संगंत सारित हेन्द्रीर रिसरिवास) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Gentral Universities Ad 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

# PAPER IV: ELECTIVE FOR PHARMACEUTICS BRANCH PRODUCT DEVELOPMENT (PRACTICAL)

Practical No.	Content	Credit
1.	To perform the preformulation study of given sample.	3
2.	To determine the particle size of given sample by photomicroscope and particle size analyzer.	3
3.	To prepare tablets and perform film coating and enteric coating.	3
4.	To prepare and evaluate emulsion of given drug sample using various type of emulsifying agents.	3
5.	To prepare and evaluate suspension of given drug sample using various types of suspending agents.	3
6.	To prepare and evaluate microcapsules of given drug.	3
7.	To prepare and evaluate dispersible tablets of given drug.	3
8.	To prepare and evaluate floating tablets of given drug.	3

# MASTER OF PHARMACY

#### M.PHARM, FIRST SEMESTER

PAPER IV: ELECTIVE FOR PHARMACEUTICS BRANCH

PRODUCT DEVELOPMENT (THEORY)

(4 hrs/week)

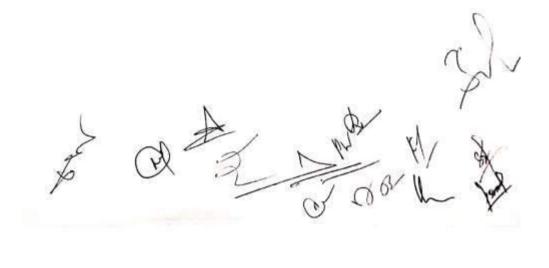

Unit	Content	Credit
1.	Pre-formulation: Consideration of physico-chemical characteristics of medicinal agents in their dosage form. Physical characteristics: Particle size, polymorphism, crystal form, solubility, interfacial tension, salt formation, wetting of solids, flow characteristics,	
	compressibility, rheology, partition coefficient.	08
	Chemical characteristics: Degradation- Hydrolytic, oxidative, reductive, photolytic,	
	Biopharmaceutical characteristics: Liquid solubility, dissociation constant, dissolution rate, bulk solubility and diffusibility in diffusion layer, drug stability in G.I. tract, complexation.	
2.	Designing of pharmaceuticals: Tablet formulation, coating of tablets, evaluation of tablets, equipments and problems in tablet.	06
3.	Liquids: Formulation consideration of oral liquids, suspensions, emulsions, parenteral, ophthalmic, depot products, large volume and small volume parenterals, environmental control and quality assurance in parenteral drug manufacturing.	10
4.	Introduction to controlled and novel drug delivery systems, sustained release dosage forms, prodrug concept, nanoparticles, liposomes, resealed erythrocytes, transdermal and other novel drug delivery systems.	11
5.	Stability testing of solid and liquid dosage forms: Difference in approaches for stability testing of solid and liquids, kinetic principles, physical and chemical stability testing of pharmaceutical dosage forms and packages.	07
6.	Pilot plant scale-up techniques: Evaluation of formula, equipments, raw materials, process, stability, uniformity, techniques related to tablets including coating, capsules, liquid dosage forms and semi-solid dosage forms.	06

- 1. L. Lachmann, H.A. Liberman, J.I. Kanig, The theory and practice of industrial pharmacy, Lea and Febiger, Philadelphia.
- G.S. Banker, C.T. Rhodes, Modern pharmaceutics, Marcel Dekker Inc., New York and Basel.

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ad 2009 Mo. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

## PHARMACEUTICS (MPH) SECOND SEMESTER

#### MASTER OF PHARMACY

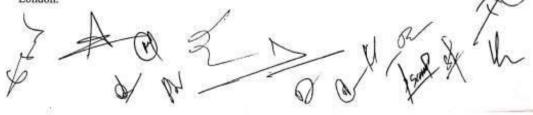

# M.PHARM. SECOND SEMESTER

PAPER I: ADVANCED PHARMACEUTICS (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Recent advances in tablet technology, parenteral technology and microencapsulation.	6
2.	Process automation on pharmaceutical manufacturing role of GMP, quality assurance and validation.	5
3.	Formulation development of vitamin and antibiotics products.	3
4.	Disperse systems: Molecular dispersion, solubilization theory, methods of solubility enhancement, factors influencing solubility.	5
5,	Coarse dispersion: Physical stability of suspensions and emulsions, role of zeta potential in stability of coarse dispersions, theory of emulsification, micro and multiple emulsions, rheology of suspensions and emulsions, drug kinetics in coarse disperse systems, drug diffusion in coarse dispersion systems.	9
6.	Stability indicating assays.	4
7.	Advances in polymer sciences and its applications in pharmacy.	4
8.	Radio pharmaceuticals: Production, control and its applications.	4
9.	Collection and classification of experimental data and its statistical treatment, method of least squares, correlation coefficient and multiple regression test of significance and student test.	5
10.	Statistical quality control, process control, control chart, acceptance sampling plans.	3

## MASTER OF PHARMACY

#### M.PHARM. SECOND SEMESTER

#### PAPER II: BIOPHARMACEUTICS AND PHARMACOKINETICS (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Transport of drugs through membranes and barriers other than GI tract. Buccal absorption, salivary excretion of drugs, excretion of drugs via swet, excretion of drugs in to milk, penetration of drugs in to eye, transfer across placenta, passage of drugs in to and out of cerebrospinal fluid and brain.	06
2.	Measurement and interpretation of <i>in vitro</i> rates of dissolution, intrinsic rates of dissolution of drugs from solid dosage forms, various modern methods and models for testing dissolution rate, factors and kinetics of dissolution.	06
3.	Bioavailability and bioequivalence: Bioequivalence and its determination, study design for the assessment of bioavailability and bioequivalence, factors influencing bioavailability and bioequivalence, correlation of <i>in vitro</i> dissolution and <i>in vivo</i> bioavailability, statistical concepts in estimation of bioavailability and bioequivalence.	06
4.	Pharmacokinetics: Consideration of one two and multiple compartment models on intravenous administration, intravenous infusion and first order absorption of single dose, kinetics of multiple dosing, dosage regimens, loading and maintenance doses, one and two compartment models on intravenous administration and first order absorption of single dose. Kinetics of reversible pharmacological effects – direct and indirect effects.	10
5.	Clinical pharmacokinetics: Concept, absorption, distribution and renal clearance and elimination, disposition and absorption kinetics, intravenous dose, constant i.v. infusion, extravascular dose, metabolite kinetics, therapeutic regimens, therapeutic response and toxicity, dosage regimens, clinical trial studies.	07
6.	Physiologic pharmacokinetic model: Concepts, physiologic pharmacokinetic models with binding blood flow – limited versus diffusion – limited model, applications and limitations of physiologic pharmacokinetic models, mean residence time (MRT), statistical moments theory, mean absorption time (MAT), mean dissolution time (MDT).	08
7.	Non-linear pharmacokinetics: Recognition of non linearity one and two compartment open model with Michaelis-Menton kinetics, determination of Km and Vm, Non-linear tissue binding constants.	05

Courses Focus on Employability/Entrepreneurship/Skill Development

# MASTER OF PHARMACY

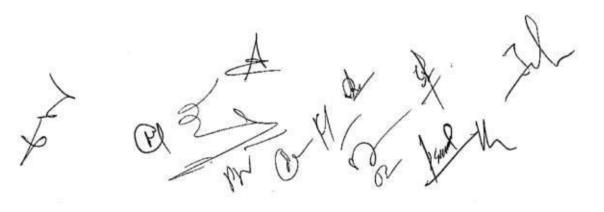

### M.PHARM. SECOND SEMESTER

PAPER III: CONTROLLED AND NOVEL DRUG DELIVERY SYSTEMS (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Fundamentals of controlled release drug delivery: Influence of drug properties and routes of drug administration on the design of sustained and controlled release system, pharmacokinetic/pharmacodynamic basis of drug delivery, dosing considerations and bioavailability assessment, regulatory assessment.	12
2.	Design and fabrication of oral controlled release drug delivery systems, parenteral products, implantable products, transdermal therapeutic system, prodrugs as sustained chemical delivery systems.	12
3.	Biochemical and molecular approach to controlled drug delivery: Liposomes, niosomes, microspheres, resealed erythrocytes, nanoparticles, osmotic pumps.	12
4.	Targeted drug delivery: Definition, concept, target-drug interactions, delivery systems.	06
5.	Advances in controlled and novel drug delivery including cosmetics.	06

#### MASTER OF PHARMACY

### M.PHARM. SECOND SEMESTER PAPER IV: PHARMACEUTICAL PACKAGING (THEORY)

(4 hrs/week)

Unit	Content	Credi
1.	An introduction to phannaceutical packaging	3
2.	The packaging function: management, development and product shelf life.	4
3.	Regulatory aspects of pharmaceutical packaging.	4
4.	Specifications and quality.	3
5.	Paper and board based packaging materials and their use in pack security systems.	4
6.	Glass containers.	4
7.	Plastics: An introduction, development and approval of a plastic pack.	5
8.	Films, foils and laminations (combination materials)	3
9.	Metal containers.	3
10.	Closures and closure systems.	3
11.	Sterile products and the role of rubber components.	3
12.	Blister, strip and sachet packaging.	4
13.	Warehousing, handling and distribution.	3
14.	Printing and decoration.	2

- 1. D.A. Dean, E.R. Evans, I.H. Hall, Pharmaceutical packaging technology, Taylor and Francis.
- K. Harburn, Quality control of packaging materials in the pharmaceutical industry, Informa Healthcare.
- A.L. Brody, K.S. Marsh, Encyclopedia of packaging technology, John Wiley and Sons, New York.
- Quality assurance of pharmaceuticals: A compendium of guidelines and related materials, 2<sup>nd</sup> edition, World Health Organization.
- 5. L.K. Styres, Modern packaging encyclopedia, Packaging Catalog Corporation Publications.
- 6. S.E.M. Selke, Understanding plastic packaging technology, Hanser Verlag Publications.

## MASTER OF PHARMACY

#### M.PHARM. SECOND SEMESTER PHARMACEUTICS (PRACTICAL)

Practical No.	Content	Credit
1.	To prepare and evaluate hydrodynamically balanced system (HBS) of the given drug.	2
2.	To prepare and evaluate microemulsions using emulsification technique for the provided drug.	2
3.	To prepare and evaluate colon delivery tablet of the provided drug.	2
4.	To prepare and evaluate matrix based microcapsules of the given drug sample.	2
5.	To perform bioequivalence testing of marketed tablets.	2
6.	To compare dissolution rate of marketed tablets using different dissolution apparatus.	2
7.	To determine protein binding of drug by equilibrium dialysis method.	2
8.	To determine salivary excretion of paracetamol.	2
9.	To prepare and evaluate microcapsules of given drugs.	2
10.	To prepare and evaluate microspheres of given drug by emulsification method.	2
11.	To prepare and evaluate liposomes of given drug sodium.	2
12.	To prepare and evaluate osmotic pump tablets.	2

## PHARMACEUTICAL CHEMISTRY (MPC) FIRST SEMESTER

#### MASTER OF PHARMACY

# M.PHARM. FIRST SEMESTER PAPER I: MODERN RESEARCH METHODS (THEORY)

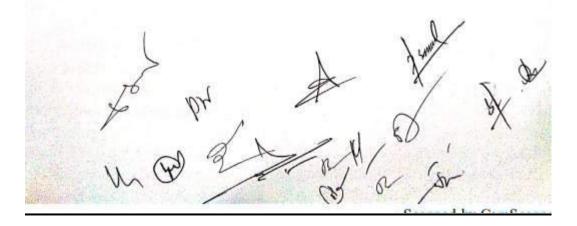

(4 hrs/week)

All topics will include instrumentation methodologies, techniques and applications to structural and quantitative analysis of drug and their methodologies.

Content	Credit		
Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC.	12		
Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy	20		
	6		
Statistical treatment of data, test for significance, analysis of variance, multivarient statistics.	6		
	Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC. Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy and plasma emission spectroscopy, electron microscopy. Radio assaying, radioimmuno assaying and autoradiography. Computer aids in pharmaceutical analysis Statistical treatment of data, test for significance, analysis of variance,		

## **Books Recommended:**

- 1. J.R. Dyer, Application of absorption spectroscopy.
- 2. Nakanishi, Infrared absorption spectroscopy.
- 3. William Kemp, Organic spectroscopy.
- 4. P.S. Kalsi, Spectroscopy of organic compounds.
- 5. Silverstein and Bassler, Spectroscopy of organic compounds.
- Dudley William, Ian Flemming, Spectroscopic methods in organic chemistry, Tata McGraw Hill.
- 7. Williard, Merrit, Dean, Instrumental methods of analysis.

Courses Focus on Employability/Entrepreneurship/Skill Development

## गुरू घासीदास विश्वविद्यालय (हेदेर रिसरिवाल अधिम 2008 ह. 25 हे संगंत साथि हेईप रिवरिवाल) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

Practical No.	Content	Credit
1.	To estimate the given sample of aspirin using UV spectroscopic method.	2
2.	To find out the effect of substituent in the absorption spectra of benzoic acid.	2
3.	To estimate the concentration of given sample of aspirin by colorimetric method.	2
4.	To estimate the given sample of ascorbic acid using visible spectroscopic method.	2
5.	To determine the percentage of acetyl salicylic acid in the given sample using back titration method.	2
6.	To determine the content of metronidazole in the given sample using UV spectroscopic method.	2
7.	To determine the total hardness of water of the given sample.	2
8.	To separate and identify the given amino acids using ascending paper chromatography.	2
9.	To study the kinetics of aspirin hydrolysis using visible spectrophotometric method.	2
10.	To separate and identify the given samples using thin layer chromatography.	2
11.	To perform the estimation of paracetamol using visible spectroscopic method.	2
12.	To determine the content of paracetamol in the given sample using UV spectroscopic method.	2

- J.R. Dyer, Application of absorption spectroscopy.
- 2. Nakanishi, Infrared absorption spectroscopy.
- 3. William Kemp, Organic spectroscopy.
- 4. P.S. Kalsi, Spectroscopy of organic compounds.
- 5. Silverstein and Bassler, Spectroscopy of organic compounds.
- Dudley William, Ian Flemming, Spectroscopic methods in organic chemistry, Tata McGraw Hill.
- Williard, Merrit, Dean, Instrumental methods of analysis.

## गुरू घासीदास विश्वविद्यालय (हेदेर विसविवास अधिनम 2008 ह. 25 हे संतर्भत साहिर हेईद विवविवास) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

[ D	nit Content	Credit
T	<ol> <li>Introduction: Biotechnology as an interdisciplinary area, traditional and modern biotechnology, technologies used in bistechnology, global impact of biotechnology on healthcare.</li> </ol>	04
	2. Recombinant DNA technology: Physical and chemical nature of DNA, DNA replication in prokaryotes and enterpotes, tools and techniques of genetic engineering, aite directed mataganesis, polymerase chain reaction and analysis of DNA sequences, gene library, advantages of producing biotechnological products by recombinant means, plants and transgenic animals as potential acurees of recombinant biotechnological products, typical opstream and downstream process, product recevery, concentration and chromatingniphic purification, product stabilization and formulation, chromatingniphic purification, product stabilization and formulation, chromatingniphic purification, product stabilization and formulation, chromating process, establishing purity and safety.	12
3.	and the second s	05
4.	Gene therapy: Brief concept, gene delivery by viral and non viral vectors, applications in treatment of stagle gene disorders such as cystic fibrasis, ADA etc.	05
5.	Immunology and immunological preparation: Introduction to immunology, antigen natibodies, cells and organs of immune system, active and passive immunity, intigen antibody reactions and their applications, hypersensitivity, immunological tolerance, classification of immunologicals, typical manufacture techniques for vaccines and antisera, preparations, standardization and storage, objuvants and their application in vaccine design, new generation vaccines such as sub- unit vaccines, DNA vaccines etc.	13
	Hybridoma technology: Formation and selection of hybrid cells, principles and productions of meoordanal intibodies, commercial, production, characterization, quality control and storage of monoclonal antibodies, advantages and applications of monoclonal antibodies.	0
	Enzyme technology: Different techniques of immobilization of enzymes and whole cells, advantages and disadvantages of immobilization, kinetics of immobilized enzymes, applications and future of immobilized enzyme technology.	0

- 1. D.J.A. Crommelin, R.D. Sindelar, Pharmaceutical biotechnology, Taylor and Francis.
- 2. M.G. Grooves, Pharmaceutical biotechnology, Taylor and Francis.
- G. Walsh, Pharmaceutical biotechnology Concepts and applications, Willey Interscience Ltd.
- 4. S.P. Vyas and V.K. Dxit, Pharmaceutical biotechnology, CBS Publications.

Practical No.	Content	Credit
1.	Colorimetric estimation of proteins (Biuret/Lowry/Bradford method).	2
2.	Changes in conformation of proteins by viscosity measurement.	2
3.	DNA isolation from onion/spleen/coconut endosperm and its characterization.	2
4.	DNA estimation by Diphenyl amine method.	2
5.	Electrophotetic (paper) separation of plasma proteins.	2
6.	Quantitative precipitation (Antigen-antibody) test.	2
7.	Agglutination (ABO blood group typing) test.	2
8.	Enzyme immobilization in alginate beads and its characterization.	2
9.	Enzyme immobilization by cross linking and its characterization.	2
10.	Solvent/salt precipitation of proteins.	2
11.	Dialysis and concentration of protein solutions.	2
12.	Freeze drying of given protein sample.	2

- 1. D.J.A. Crommelin, R.D. Sindelar, Pharmaceutical biotechnology, Taylor and Francis.
- 2. M.G. Grooves, Pharmaceutical biotechnology, Taylor and Francis.
- G. Walsh, Pharmaceutical biotechnology Concepts and applications, Willey Interscience Ltd.
- 4. S.P. Vyas and V.K. Dxit, Pharmaceutical biotechnology, CBS Publications.

गुरू घासीदास विश्वविद्यालय (हेदेव विवविद्यालय अधिनम 2000 ह. 25 हे संगंध साधित हेईव विवविद्याल) कोनी, बिलासपुर - 495009 (छ.ग.)

#### MASTER OF PHARMACY

# M.PHARM, FIRST SEMESTER

PAPER III: DRUG REGULATORY AFFAIRS AND QUALITY ASSURANCE (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Requirements of GMP, CGMP, GLP, USFDA, WHO guidelines and ISO 9000 series.	7
2.	Drugs and cosmetics acts and rules, drug regulatory affairs.	5
3.	Documentation: Protocols, forms and maintenance of records in pharmaceutical industry.	3
4.	Preparation of documents for new drug approval and export registration.	3
5.	Processing and its application intellectual property rights (patent, copyright and trade marks).	7
6.	Sewage disposal and pollution control.	3
7.	Concepts in validation, validation of manufacturing, analytical and process validation and its application.	4
8.	Basic concept of quality control and quality assurance systems, source and control of quality variation of raw materials, containers, closures, personnel, environment, etc.	5
9.	In process quality control tests, IPQC problems in pharmaceutical industries.	4
10.	Sampling plans, sampling and characteristic curves.	3
11.	Master formula generation and maintenance, standard operating procedure (SOP) for different dosage forms.	4

#### **Books Recommended:**

- 1. Willing, Tuckerman, Hitching, Good Manufacturing practices for pharmaceuticals.
- 2. Drugs and cosmetics acts and rules.
- 3. Bharathi, Drugs and pharmacy laws in India.
- 4. Patel, Industrial microbiology.
- 5. B.T. Loftus, R.A. Nash, Pharmaceutical process validation.
- 6. S. Bolton, Pharmaceutical statistics.
- 7. G.S. Banker, C.T. Rhodes, Modern pharmaceutics.
- 8. OPPI, Quality assurance.

9. Carletiori, Validation of aseptic pharmaceutical process.

10. Garfield, Quality assurance principles for analytical laboratories.

- 11. Indian pharmacopoeia.
- 12. British pharmacopoeia.
- 13. United State pharmacopoeia.

Courses Focus on Employability/Entrepreneurship/Skill Development

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

Unit		
I. Ste	Content Content Content	Cree
1.	Stereo isomerisin, geometrical isomers and optical isomers, basic concepts of optical activity and chirality, structural features necessary for optical activity.	3
2.	Configuration and its specifications, correlation of configuration, absolute configuration, methods of determining configurations, racemic modification, resolution and optical purity.	3
3.	Stereo chemistry of olefins-cis-trans, stereo chemistry of ring systems including fused ring and bridged rings.	
4.	Conformation and reactivity in acyclic compounds, conformational analysis.	
5.	Conformation in open chain, six membered rings and other ring having hetero atoms.	
6.	Steric strain in small rings, medium rings, unsaturated rings and unavoidable crowdings.	
7.	Stereo selective and stereo regulated polymerization, asymmetric synthesis, chiral induction, chiral reagents, catalysis and solvents (industrially used), asymmetric synthesis of amino acids, $\beta$ -lactams.	
II. Re	action mechanisms	-
1.	Methods for determining reaction mechanism.	1
2.	Aliphatic nucleophillic substitutions with special emphasis on mechanism and reactivity.	d
3.	Aliphatic electrophillic substitutions with special emphasis on mechanism and reactivity.	d
4.	Aromatic electrophillic substitutions with special emphasis on mechanism orientation and reactivity.	ı,
5.	Aromatic nucleophillic substitutions with special emphasis on mechanism an reactivity.	d
6.	Free radical substitution with special reference to mechanism and reactivity.	-
7.	Addition to carbon-carbon multiple bonds with special reference to mechanism and reactivity.	m

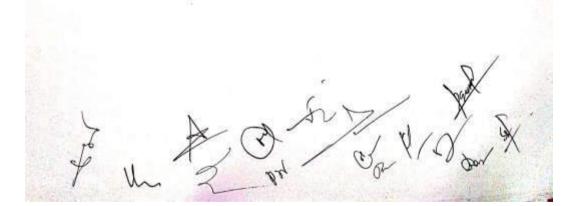

गुरू घासीदास विश्वविद्यालय राज्य अधिरिक्य २००० क २६ के अंतर्पत प्रतापित केलेज किली कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Act 2009 No. 25 of 2009) Koni, Bilaspur - 495009 (C.G.)

8.	Addition to carbon-heteroation multiple bonds with special reference to mechanism and reactivity.	2
9.	Eliminations with special reference to mechanism, orientation and reactivity.	3
10,	Rearrangements with special emphasis on mechanism and reactivity.	2
11.	Generation of nitronium and ions nitrone their reactivity	2
12.	Oxidation and reduction reaction with special emphasis on mechanism and reactivity.	3
13.	Mechanistic consideration in detail for the following organic reactions. Beckmann, Hofmann, Curtius, Schmidt, Frie's rearrangements, Benzilic acid, Claisen's condensation, Wittig's reaction, Oppenaurr oxidation, Birch's reduction, Clemensen's reduction, Reimer-Tiemann's reaction, Meerwin Pondorff's Valery reaction, Wolf-Kishner's reduction, Michaels condensation, Diels Alder reaction, Cannizzarro's reaction.	4

# PAPER IV: ELECTIVE FOR PHARMACEUTICAL CHEMISTRY BRANCH STEREO CHEMISTRY AND REACITON MECHANISM (PRACTICAL)

Practical No.	Content	Credit
1.	To prepare and analyze N-benzoyl-B-alanine.	2
2.	To prepare and analyze ethyl acetoacetate.	2
3.	To prepare and analyze benzene β-azonaphthol.	2
4.	To prepare and analyze isatoic anhydride from phthalic anhydride.	2
5,	To prepare and analyze isatoic anhydride from phthalamic acid.	2
6.	To prepare and analyze benzyl alcohol and benzoic acid by Cannizzaro reachtion.	2
7.	To draw, construct and demonstrate different molecular models with the help of balls and sticks.	2
8.	To prepare organic compounds by stereo selective synthesis.	2
9.	To prepare, submit and analyze phenytoin from benzil.	2
10.	To prepare, submit and analyze dibenzalacetone from benzaldehyde.	2
11.	To prepare, submit and characterize p-nitro aniline from p- nitroacetanilide.	
12.	To prepare, submit and analyze methyl organge from sulphanilic acid.	2

- 1. Kar Ashutosh, Advanced practical medicinal chemistry.
- 2. V.I. Arthur, Elementary practical organic chemistry, Part I: Small scale preparation, CBS Publishers, New Delhi.

#### PHARMACEUTICAL CHEMISTRY (MPC) SECOND SEMESTER

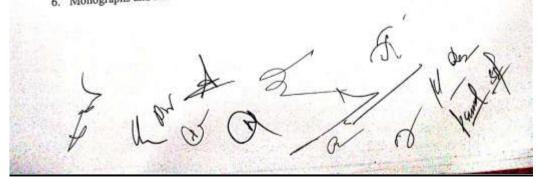

# MASTER OF PHARMACY

# M.PHARM. SECOND SEMESTER PAPER I: ADVANCED PHARMACEUTICAL CHEMISTRY-I (THEORY)

(4 hrs/week)

Unit Content Credit Molecular dissymmetry, compounds with one or two dissymmetric carbon I. atoms (like and unlike). 04 Racemic modification: Nature, formulation, properties and resolution. 2. 04 Configuration: Absolute and relative. 3. 04 4. Conformation: five, six, seven and eight membered ring systems, conformation 06 of six membered heterocyclic rings (an introductory approach), atropisomerism. Stereoisomerism of allenes, alylidene, spiranes, axo-dissymmetry and centre of 5. 05 dissymmetry. 05 SN', SN', SN', SN', SN' and SNAr reactions with their mechanism. 6. 04 Hydrolysis of ester, E1 and E2 mechanism, Hoffman and Sayetzef elimination. 7. Rearrangement: Pinocol and related rearrangements, benzillic acid 8. rearrangement, Beckmann rearrangement, Hofmann, Curtius, Lossen and Schmidt rearrangements, Claisen rearrangements, Birch reduction, Mannich 16 reaction, Meerwein-Ponndorf-Verley reduction and Oppeneur oxidation, Ozonolysis and Hydrogenation.

- 1. E.J. Ariens, Drug design, Academic Press, New York.
- 2. E.L. Eliel, Stereo chemistry of carbon compounds, Mc Graw Hill Book Company Inc.,
- 3. S.H. Salkovisky, A.A. Sinkula, S.C. Valvani, Physical chemical properties of drug, Marcel
- 4. J. March, Advanced organic chemistry reaction mechanism and structure, John Willey Dekker Inc., New York.
- 5. E.S. Gould, Mechanism and structure in organic chemistry, Holt, Rinewart and Winston,
- Monographs and relevant review articles appearing in various periodicals and journals.

	PAPER II: ADVANCED PHARMACEUTICAL CHEMISTRY-II (THEORY) (4 hrs/week)	
Unit	Content	1
1.		Credit
10.000	steroid nucleus, chemistry of oestrone and corticosterone, structure activity relationship of sex hormones.	12
2.	A study of phenothiazine, tranquillizeres and antidepressants, structural requirements for the anti-thyroid activity, antihyperlipidimic agents, polypeptides like oxytocin, insulin and haemoglobin (excluding elucidation of structure).	12
	The following topics would be dealt with incorporating the latest advances	-
3.	Antifertility agents, methods of fertility control, steroidal and non-steroidal antiferility agents, abortifacients.	12
4.	Endorphins: discovery of enkephalins and endorphins, dynorphins.	0
	Radioprotective drugs.	0

- M.E. Wold, Brugers medicinal chemistry, John Wiley and Sons, New York, Volume I, II and III.
- R.F. Doerge, Wilson and Gisvold's text book of organic medicinal and pharmaceutical chemistry, Lippincott.
- 3. W.O. Foye, Principles of medicinal chemistry, Lea and Febiger, Philadelphia.
- 4. Finar, Chemistry of natural products, Volume I and II.
- 5. Monographs and relevant review articles

	MASTER OF PHARMACY M.PHARM. SECOND SEMESTER PAPER IV: DRUG DESIGN (THEORY) (4 hrs/week)	
Unit		
1.	Three dimensional structure cid to	Credi
	Content Three dimensional structure aided drug design: The structure-aided drug design process, methods to derive three dimensional structures, The design process, software aided drug design, examples of structure aided drug design process. Quantitative structure activity solutions	12
2.	Quantitative structure activity relationships (QSAR): parameters, quantitative models, statistical methods, design of test and training series in QSAR, application of Hansch analysis and Free Wilson analysis, 3D QSAR approaches for drug design.	12
3.	Molecular modeling in drug design: Molecular mechanics and Quantum mechanics, known and unknown receptor.	8
4.	Analog design.	4
5,	Rational design of enzyme inhibitors.	4
6.	Role of natural products in drug design.	4
7.	Recombinant DNA technology in drug design.	1.

#### **Books Recommended**

- 1. K. Hugo, QSAR, Hansch analysis and related approaches.
- 2. K.L. Poul, A text book of drug design and development.
- 3. J.P. Thomas, C.L. Propst, Computer aided drug design.
- 4. P. Veerapandian, Structure based drug design.
- 5. S.C. Paul, Practical applications of computer aided drug design.
- 6. L. Paul, Receptor based drug design.
- 7. C. Hansch, Comprehensive medicinal chemistry, Volume IV.
- 8. Bruger's medicinal chemistry, Volume I, 6th edition.
- 9. J.D. Watson and Tooze, "Recombinant DNA techniques" A short course.

#### गुरू घासीदास विश्वविद्यालय (हेदेर रिसरिवाल अहिंग्ल 2008 ह. 25 हे संगंत सारित हेन्द्रेर रिस्टीवाल) कोनी, बिलासपुर - 495009 (छ.ग.)

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Gentral Universities Ad 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

Practical No.	Content	Credit				
1.	acid rearrangement. Benzil-Benzilic					
2.	To prepare, analyze and submit Dihydropyrimidinone from ethyl acetoacetate using green chemistry approach.					
3.	To prepare, analyze and submit 2-amino-5-phenyl-1,2,3-thiadiazole.					
4.	To prepare, analyze and submit benzocaine from benzoyl chloride or To prepare, analyze and submit benzoyl glycine from glycine.					
5.	To prepare, analyze and submit o-amino benzoic acid (anthranilic acid) or o-chlorobenzoic acid.					
6.	To carry out the synthesis of phenytoin from benzaldehyde.					
7.	To carry out the synthesis of 7-hydrody 4-methyl coumarin from resorcinol.	2				
8.	To carry out the synthesis of benzimidazole from phenylene diamine.	2				
9.	To prepare and analyze methyl orange from aniline.	2				
10.	To prepare and analyze dibromofluorescin or sodium cosin from phthalic anhydride.	2				
11.	To prepare, analyze and submit p-bromobenzanilide from benzophenone or To prepare, analyze and submit acetyl salicylic acid from salicylic acid using green chemistry approach.	2				
12.	To carry out the synthesis of 2,5-piperazine dione from glycine.	2				

#### **Books Recommended**

1. Kar Ashutosh, Advanced practical medicinal chemistry.

- V.I. Arthur, Elementary practical organic chemistry, Part I, II and III: Small scale preparation, CBS publishers, New Delhi.

#### PHARMACOLOGY (MPL) FIRST SEMESTER

#### MASTER OF PHARMACY

#### M.PHARM. FIRST SEMESTER PAPER I: MODERN RESEARCH METHODS (THEORY)

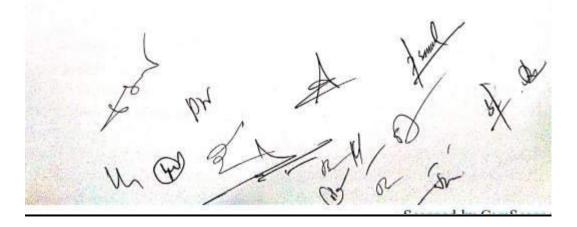

(4 hrs/week)

All topics will include instrumentation methodologies, techniques and applications to structural and quantitative analysis of drug and their methodologies.

Content	Credit
Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC.	12
Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy and plasma emission spectroscopy, electron microscopy.	20
Radio assaying, radioimmuno assaying and autoradiography.	
	4
Statistical treatment of data, test for significance, analysis of variance, multivarient statistics.	6
	Gas chromatography, high pressure liquid chromatography, gel filtration, electrophoresis, ion-pair chromatography and HPTLC.         Ultra violet, infra-Red (including FTIR), nuclear magnetic resonance (including <sup>13</sup> C-NMR) and mass spectroscopy, atomic spectroscopy and plasma emission spectroscopy, electron microscopy.         Radio assaying, radioimmuno assaying and autoradiography.         Computer aids in pharmaceutical analysis         Statistical treatment of data, test for significance, analysis of variance,

#### **Books Recommended:**

- 1. J.R. Dyer, Application of absorption spectroscopy.
- 2. Nakanishi, Infrared absorption spectroscopy.
- 3. William Kemp, Organic spectroscopy.
- 4. P.S. Kalsi, Spectroscopy of organic compounds.
- 5. Silverstein and Bassler, Spectroscopy of organic compounds.
- Dudley William, Ian Flemming, Spectroscopic methods in organic chemistry, Tata McGraw Hill.
- 7. Williard, Merrit, Dean, Instrumental methods of analysis.

Courses Focus on Employability/Entrepreneurship/Skill Development

Practical No.	Content	Credit
1.	Colorimetric estimation of proteins (Biuret/Lowry/Bradford method).	2
2.	Changes in conformation of proteins by viscosity measurement.	2
3.	DNA isolation from onion/spleen/coconut endosperm and its characterization.	2
4.	DNA estimation by Diphenyl amine method.	2
5.	Electrophotetic (paper) separation of plasma proteins.	2
6.	Quantitative precipitation (Antigen-antibody) test.	2
7.	Agglutination (ABO blood group typing) test.	2
8.	Enzyme immobilization in alginate beads and its characterization.	2
9.	Enzyme immobilization by cross linking and its characterization.	2
10.	Solvent/salt precipitation of proteins.	2
11.	Dialysis and concentration of protein solutions.	2
12.	Freeze drying of given protein sample.	2

Guru Ghasidas Vishwavidyalaya (A Central University Established by the Central Universities Ant 2009 No. 25 of 2009) Koni, Bilaspur – 495009 (C.G.)

#### MASTER OF PHARMACY

#### M.PHARM, FIRST SEMESTER

PAPER III: DRUG REGULATORY AFFAIRS AND QUALITY ASSURANCE (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Requirements of GMP, CGMP, GLP, USFDA, WHO guidelines and ISO 9000 series.	7
2.	Drugs and cosmetics acts and rules, drug regulatory affairs.	5
3.	Documentation: Protocols, forms and maintenance of records in pharmaceutical industry.	3
4.	Preparation of documents for new drug approval and export registration.	3
5.	Processing and its application intellectual property rights (patent, copyright and trade marks).	7
6.	Sewage disposal and pollution control.	3
7.	Concepts in validation, validation of manufacturing, analytical and process validation and its application.	4
8.	Basic concept of quality control and quality assurance systems, source and control of quality variation of raw materials, containers, closures, personnel, environment, etc.	5
9.	In process quality control tests, IPQC problems in pharmaceutical industries.	4
10.	Sampling plans, sampling and characteristic curves.	3
11.	Master formula generation and maintenance, standard operating procedure (SOP) for different dosage forms.	4

#### **Books Recommended:**

- 1. Willing, Tuckerman, Hitching, Good Manufacturing practices for pharmaceuticals.
- 2. Drugs and cosmetics acts and rules.
- 3. Bharathi, Drugs and pharmacy laws in India.
- 4. Patel, Industrial microbiology.
- 5. B.T. Loftus, R.A. Nash, Pharmaceutical process validation.
- 6. S. Bolton, Pharmaceutical statistics.
- 7. G.S. Banker, C.T. Rhodes, Modern pharmaceutics.
- 8. OPPI, Quality assurance.

- 10. Garfield, Quality assurance principles for analytical laboratories.
- 11. Indian pharmacopoeia.
- 12. British pharmacopoeia.
- 13. United State pharmacopoeia.

Courses Focus on Employability/Entrepreneurship/Skill Development

गरू घासीदास विश्वविद्यालय र अधिनियम 2009 क 25 के अंतर्पल स्थापित केन्द्रीय किन्द्रीय कोनी, बिलासपुर - 495009 (छ.ग.)

#### 8MASTER OF PHARMACY

#### M.PHARM, FIRST SEMESTER PAPER IV: ELECTIVE FOR PHARMACOLOGY BRANCH BASIC AND MOLECULAR PHARMACOLOGY (THEORY)

(4 hrs/week)

Content	Credit
Molecular structure of the biological membrane and transport mechanisms across the cell membrane, factors influencing drug absorption, drug distribution, protein binding, tissue binding, blood brain barrier, placental barrier, volume of distribution.	14
Biotransformation of drugs: Microsomal, non-microsomal metabolism, factors influencing, enzyme induction and inhibition pharmacogenetics.	03
Drug excretion: Renal and non renal, factors influencing renal clearance, biological half life.	1
Pharmacokinetics: Single and multiple dose therapy, single and multiple compartmental models, bioavailability.	03
	12
	03
get in a days recentors and drug receptor interactions, ion	n
Receptors: Theories of drug receptors and drug receptors of drug action, G channels, drug antagonism, cellular and molecular basis of drug action, G protein coupled receptors,	- 10

#### PAPER IV: ELECTIVE FOR PHARMACOLOGY BRANCH BASIC AND MOLECULAR PHARMACOLOGY (PRACTICAL)

Practical No.	Content	Credit
1.	Introduction to experimental pharmacology, CPCSEA & IAEC.	2
2.	To study the effects of different drug on isolated frog heart preparation, guinea pig ileum, rabbit eye, eiliary motility, dogs blood pressure using pharmacology software.	2
3.	To record the concentration response curve of acetylcholine using cock ileum/rat ileum.	2
4.	To determine the concentration of given sample of acetylcholine by matching bioassay method using cock ileum/ rat ileum.	2
5.	To determine the unknown concentration of acetylcholine sample using cock ileum preparation by bracketing method.	2
6.	To determine the unknown concentration of acetylcholine sample by interpolation bioassay method using cock ileum.	2
7.	To record a cumulative response curve of acetylcholine by using cock ileum.	2
8.	To study the potentiating effect acetylcholine by neostigmine.	2
9.	To study the different routes of drug administration in rats/mice/ To study the techniques of animal handling.	2
10.	To study oestrous cycle in rats using vaginal smear.	2
11.	To demonstrate Introcerebroventricular (I.C.V.) cannulation implantation in mice	1
12.	To demonstrate cannulation of carotid artery in rat/ To demonstrate ovarectomy of female rat.	2

#### MASTER OF PHARMACY

#### M.PHARM. SECOND SEMESTER PAPER II: PHARMACOLOGICAL SCREENING METHODS (THEORY)

(4 hrs/week)

Unit	Content	Credit
1.	Pharmaceutical screening techniques to evaluate drugs on different system.	3
2.	Animal models of diabetes, arrhythmia, asthma, hypertension, reproduction, ulcers and convulsions.	6
3.	Evaluation of drugs acting on ANS.	5
4.	Evaluation of drugs acting on CNS.	7
5.	Drugs acting on respiratory system.	5
6.	Evaluation of drugs acting on kidney.	4
7.	Animals ethics.	4
8.	Bioassays (quantitative determination) of PD, PA Quantal assays, determination of LD <sub>50</sub> and ED <sub>50</sub> .	6
9.	Drug toxicity and safety evaluation.	4
10.	Alternative to animals screening procedure.	1
