	1	
		<ul> <li>principles &amp; Procedures of Accounting Standards, Ind AS &amp; IFRS.</li> <li>✓ Interpret and illustrate the Investment Accounts with relevant accounting standard.</li> <li>✓ Explain Accounting for Voyage Accounts, &amp; Royalty Accounts.</li> <li>✓ Learn the deep insight of all the accounting aspects of liquidation of company.</li> <li>✓ Describe accounting treatments for corporate events like Amalgamation, Reconstruction and Restructuring and interpreting the relevance of various accounting regulations and provisions related to such events in context of existing legal and regulatory environment.</li> <li>Course objective: The objective of this course is to equip students</li> </ul>
MC-103	Statistical Analysis	<ul> <li>The objective of this course is to equip students with some important statistical techniques for decision making and to provide ground for learning advanced statistical tools used in research.</li> <li>Course Outcome: The successful completion of this course shall enable the students: <ul> <li>To develop logical reasoning ability in decision making.</li> <li>To apply various parametric and non-parametric tests in the real life case situation.</li> <li>To make decisions under uncertain business situations.</li> <li>To bring out clearly the importance of statistics in solving different research problems.</li> </ul> </li> </ul>
MC-104	Managerial Economics	Course objective: This course provides students with the knowledge, tools and techniques to make effective economic decisions under conditions of risk and uncertainty. Demand, cost and pricing decisions are emphasized. Topics include decision-making criteria and procedures, demand and cost theory and estimation, demand and sales forecasting, pricing and estimation of new products and competitive bids and price quotes. Course Outcome: On completion of this course, learners will be able to: 1. Apply the economic way of thinking to individual decisions and business decisions. 2. Understand the different approaches to theories of firm, Demand estimation and, costs of production and how they affect short and long run decision. 3. Derive the equilibrium conditions for cost minimization and profit maximization.

r		
		4. Understand economies of scale, diseconomies
		of scale, Expansion Path and Ridge Line, and how each affects the cost of production.
		1. <b>Course objective:</b> The main objective
		<b>č</b> 3
		is to give advance knowledge of
		computer application to students.
		2. To make the students understand the
		computer fundamentals, information
		technology, operating system and
		word processing, accounting
		packages and database management
		system.
		3. To make the students aware about
		how computer application can be used
		for various business operations.
		Course Outcome:
		1. Students will be able to use the
N/C 105	Computer Applications in	accounting package on their own.
MC-105	Business	2. Students will know the use and
		functioning of DBMS.
		3. Students will be able to work with
		PowerPoint.
		4. Students will be familiar with
		formatting text and document,
		working with graphics and creating
		presentation.
		5. Students will be able to use the
		various applications of internet in
		performing business operations.
		6. Students will be able to understand
		the concept of internet, internet
		security, e-mail, world wide web and
		internet browsing
		<b>Course objective:</b> The study shall enable
		students with behaviour aspects of the
		organisation.
MC-201	Organisational Theory	<b>Course Outcome:</b> After completing this course the students will be able to:
		<b>CO1:</b> Develop the team coordination and conflict
		management skills at various levels.
		<b>CO2:</b> Students come to know the about the
		changes which occurs frequently or occasionally,
