PREFACE

I feel privileged as well as delighted in presenting the Annual Report of Guru Ghasidas Vishwavidyalaya, Bilaspur, a Central University, for the year 2015-16. This annual report centers on our priorities and Multi-Year Strategic Plan. Each section focuses on each priority and each page highlights the progress made towards our strategic goals during the period.

Established in 1983 as a state university and then upgraded to the Central University in 2009, Guru Ghasidas Vishwavidyalaya has a long tradition of excellence in the education and research. The students of this university learn in a caring, personalized environment supported by a staff of over 200 teachers.

Guru Ghasidas Vishwavidyalaya, having an approximate enrolment of 6000 plus students is situated 06 kilometers from the main city with easy access by bus and frequent hired taxi. The local community is diverse in terms of ethnicity, culture and socio-economic mix, and has high expectations from the university. Our university motto, “Gian Panth Kripan ke Dhara”, has a powerful message for every student who is educated at Guru Ghasidas Vishwavidyalaya. It testifies to our belief that the path of Gian (knowledge) is like the edge of the sword. Walking on this alone can bring empowerment and salvation.

During the period, the university continued with its multipronged strategy to strengthen the infrastructure which is of ut-most priority. The information provided in the report on a wide variety of research interests, activities, publications and conference papers during the last academic year is a positive testimony of the university's academic and professional capacity.

Successful attempts have been made to implement various schemes initiated by the Ministry of Human Resource Development, University Grants Commission, and other departments of Government of India like setting up of Inspired Teachers' Club, Industry Interface Cell, massive implementation of Swachhha Bharat Abhiyaan and Unnat Bharat Abhiyaan, Global Initiative of Academic Networks (GIAN) and many more.

Considering the importance of this report as the statutory document, a great effort has been made to showcase the academic, administrative, financial and infrastructural status of the university during the session. It supports our commitment to openness, transparency and accountability in the education system.

I appreciate the hard work of the entire team of Annual Report Committee who has shown tremendous effort in showcasing the achievements of the university.

INSPIRATION

GURU GHASIDAS

Guru Ghasidas Vishwavidalaya is named after Saint Guru Ghasidas (1756-1836), a visionary social reformer. Guru Ghasidas founded Satnam Panth, a socio-religious sect, which challenged contemporary discriminatory social order and advocated for social equality by refuting the exploitative and hierarchical caste system. With his holistic vision and systematic reforms, Guru Ghasidas contributed significantly in removing the prevailing social injustice and inequality.

Satnam Panth believes that truth is God and there is only one God, which is formless (nirgun) and infinite (anant). Individual reformation was brought by prohibiting consumption of liquor and non-vegetarian food. Guru Ghansidas also formulated principles to put an end to cruelty towards animals. The partisans of satnam Panth have been following these dictates from last hundreds of years now.

After up-gradation of Guru Ghasidas University into a central university, many steps have been taken by the university authorities to translate Guruji's philosophy into reality. Now our campus is alcohol and tobacco free. Our vibrant university campus, where students from diverse castes, creeds and classes come together from all over India, provides an egalitarian environment based on Guruji's teachings.

1. INTRODUCTION

1.1 UNIVERSITY AT A GLANCE

Guru Ghasidas Vishwavidyalaya, established as the state University in 1983, is a residential University, named after Guru Ghasidas, a sixteenth century Satnami saint. The University was upgraded to a Central University under the Central Universities Act, 2009 during the XI Five Year Plan. The University is an active member of the Association of Indian Universities and Association of Commonwealth Universities. National Assessment and Accreditation Council (NAAC) has accredited the University with a B status.

Guru Ghasidas Vishwavidyalaya is located on the outskirts of the city of Bilaspur. Popularly known as Nyayadhani (the city of Justice) and Sanaskardhani (the city of culture). Bilaspur is a cosmopolitan city, which houses High Court of Chhattisgarh, the headquarters of South East Central Railways and South Eastern Coalfields Limited. The journey of the University began in a humble way with a few departments in temporary buildings in Bilaspur city. Subsequently, it was shifted to the old army barracks of Second World War in the Koni area, located on the left bank of the river Arpa. The University campus is spread over 656 acres of land. Nature has bestowed the campus with unmatched beauty, immaculate blend of green areas and water bodies.

The University offers opportunities to young minds and facilitates the accomplishment of their creative talent with emphasis on character building through various streams of knowledge. The University comprises of and 32 University Teaching Departments under 09 Schools of Studies. It offers number of undergraduate and postgraduate programs, besides diploma and postgraduate diploma courses. Admissions to all the programs are made through a competitive All India Entrance Test conducted by the University. Admissions to the Institute of Technology (IT) and Department of Management Studies are made through All India Engineering Entrance Examination (AIEEE) and Management Aptitude Test (MAT), respectively. During

2015-16 academic session, 6767 students in the teaching departments of the University have been enrolled. Chhattisgarh, formerly an under developed region, is one of the fastest growing states in the country. As an industrial hub, the state requires sizeable pool of skilled manpower. The denizens of this area can tap these opportunities in a better manner by attaining quality education and training. The University has taken extensive steps to transform both teaching and learning process in order to meet contemporary global standards. To boost the quality of teaching, the University has appointed nationally and globally trained faculty members. The University is also committed to meet an ideal student-teacher ratio. The classrooms are being modernised by installing facilities like LCD projectors, quality furniture and air conditioners where available. Students are continuously evaluated through internal assessment, assignments and end semester examinations. The transparent evaluation process, where answer-sheets of the internal assessment test are shown in the classrooms, helps the students to improve their performance. To maximize student's potential, the University has arranged excellent support facilities including hostels, cafeteria, gymnasium, student amenities centre and Wi-Fi connectivity. Through various classes—remedial spoken English, personality development and free coaching for competitive examinations—the University is committed to guard equal opportunities for students belonging to traditionally marginalised Scheduled Caste, Scheduled Tribes and other backward classes.

Special measures have been taken to provide an environment conducive for over all personality development of students. The Central Library has more than one lac books and subscribes to a number of national and international journals. Apart from the Central Library, most of the departments have their own departmental libraries. Excellent sports facilities are available in the campus and hostels. The University has planned to extend sport facilities by constructing a new gymnasium. Throughout the year, many activities are organised including Republic Day, Independence Day, Foundation Day, Education Day, Swami Vivekanand Jayanti, Sardar Vallabh Bhai Patel Jayanti, Teachers Day, Guru Ghasidas Jayanti to make the campus vibrant. Along with sports and cultural activities, students are also encouraged to participate in social outreach initiative of the University. Through these activities, students are

encultured in participatory ways of life. International and national level events are organised to expose students to new ideas of eminent persons from all walks of life. The University teaching departments organise fieldwork, industrial visits and educational tours to impart practical knowledge. To inculcate leadership qualities among students, the University has successfully constituted the student's council. The student's council represents all the students of the University.

To face challenges posed by the process of development, the University community is all set to contribute to the larger society through quality research and development in the various areas including energy security, food security, biodiversity management, pollution management, forest management and developmental policy. The UGC Human Resource Development Center regularly organises orientation and refresher courses, Short term Courses & Workshops for the capacity building of teachers and staff. During these courses, expertise of senior faculty members of the University and practitioners from diverse fields is utilised.

In the coming years, the University aims to act as a role model for the central Universities and simultaneously provide an educational opportunity to the growing number of the students of the region. The University is on the path of realising twin goals envisioned by the National Knowledge Commission; “of making higher education more relevant to the needs and opportunities of a knowledge society” and “to make higher education more accessible to all sections of the society.”

2.4 NATIONAL CENTRE FOR ACCELERATOR BASED RESEARCH, DEPARTMENT OF PURE & APPLIED PHYSICS (SUPPORTED BY UGC & DAE-BRNS)

A 3.0 MV Pelletron accelerator facility has been commissioned as National Centre for Accelerator Based Research in the Department of Pure & Applied Physics. This was conceptualized and initiated as a flagship program of the university and later on was supported by Department of Atomic Energy through BRNS, UGC as special grant under XIth-plan. An MoU with Inter University Accelerator Centre was also signed for technical support and exchange of researchers. Professor P.K. Bajpai is the Program Coordinator & centre In-charge of the National Centre for Accelerator Based Research. Energetic ions ranging from few keV to MeV have played significant role in various areas of Science & Technology. Probing ion-solid interaction using energetic ions from low energy accelerators has recently emerged as an important area of research in various fields of Science & Technology. The accelerator based interdisciplinary research centre provides state of the art research facilities through ion beam irradiation, ion implantation and ion beam analysis techniques for pursuing frontline researches in the areas of material science, nanotechnology, environment sciences, polymer chemistry, archaeology, material chemistry, conservation of biodiversity, life sciences, biotechnology, pharmaceuticals, molecular biology, etc

The installation of the accelerator was completed in March 2014. The general and radiation related safety system was completed by October, 2014. The FIRST BEAM was obtained on November 12, 2014 and the installation of the accelerator was completed in March 2014. The beam tests were started on November 6, 2014. The FIRST BEAM was obtained on November 12, 2014 and performance test acceptance was conducted successfully, and finally, the test report was accepted on 23.11.2014. Atomic Energy Regulatory Board (AERB) team completed radiation safety inspection in December, 2014 and the recommendations of the AERB committee have been received in February, 2015.

Some of the notable achievements during the period are as given below

Compliance report on these recommendations was submitted to AERB on 28 March, 2015. AERB provided clearance for machine operation for test experiments using heavy ion beams and, with the restriction that 4.0 MV proton beam to be used.

We took up maintenance of the machine in May 2015 and opened the Accelerator tank successfully, replaced the optical fibre cable of the light link through terminal potential rings by taking out the rings and re-established communication for activating the generator through fibre link. The machine has been tested (all power supplies and light link by running the accelerator in air). The tank and the Pelletron has been cleaned and the machine has been working fine after regular maintenance. We have conditioned it for almost a week and tested the terminal potential. We achieved the desired level of vacuum after detecting the leaks in some turbo vent valves and correcting it. The whole exercise took over a month and was completed on 16.05.2015. We obtained regular suggestions and support from NEC personnel (Mr. Jeremy Kasmarek and Don Benherd). Normal maintenance of Accelerator tank, SF₆ transfer unit, recirculatory system, compressed air and chillers unit was done successfully

Test experiments on PIXE were also started. The problem of communication between PIXE/RBS detector and control PC has also been resolved. The leakages in chilled water line were also tackled by replacing some of the butterfly valves and the maintenance of one Turbo molecular pump was also done with the help of Agilent.

We have been conducting test experiments on both IBA beam line and ion implantation end stations. The machine is running normally. The test experiment permission was extended beyond December 2015 by the AERB and they asked us to submit the Final Safety Analysis Report.

The meeting of the Safety Committee was also convened twice during the period and all aspects were reviewed. The report of Safety Committee was submitted to AERB.

The quarterly reports of radiation badges (TLD & neutrons) were submitted to BARC for analysis and reports were obtained. No unusual radiation dose was found in any of the batches.

The Final Safety analysis report was submitted to AERB in Feb, 2016. AERB accepted the report for presentation before the AERB committee for issuing the final licence to run the machine. Centre In-charge and Radiation Safety Officer were invited to AERB, Mumbai on 5th April, 2016 where the final safety analysis report was presented. During the discussion, the Committee recommended the issuance of licence, subject to submission of radiation safety data and beam transport data for five beams including protons, by performing beam transport experiments using highest possible energies and terminal voltages.

However, due to the unavailability of time from the Co-chairman of the Joint Advisory Committee (JAC), Dr. P.D. Gupta, Director CAT, we could not hold the meeting of JAC in March, 2015.

University Grants Commission sanctioned eight technical positions (01-Radiation safety officer, 01-Technical Officer, 04-machine operators and 02-Technical assistants) for the centre.

01-post of Professor has also been sanctioned for the Accelerator facility to run the specialization in Accelerator physics apart from coordinating researches on Accelerator facility.

A high level Program monitoring committee (PMC) has been constituted by Board of Research in Nuclear Physics (BRNS), Department of Atomic Energy, Govt. of India. The 1st meeting of the reconstituted Project Monitoring Committee (PMC) to monitor the progress of the project “Setting up of the 'National Centre for Accelerator based Research (NCAR) at Guru Ghasidas Vishwavidyalaya (GGV) Bilaspur” (ref no. 2013/34/18-BRNS dated June 19, 2013) was held at the discussion room of the NCAR, GGV, Bilaspur on January 28, 2016.

Major recommendations of PMC are as given below:

1. PMC requested Prof. Bajpai to form a National Users' Committee at the earliest. The committee should have proper nationwide representation and comprise of experts in accelerator science, nuclear physics condensed matter physics and other accelerator based applied sciences.
2. Prof. Bajpai was also requested to submit to BRNS the list of experimental proposals along with PIs' name and institute since these proposals in a way form the basis of his request of utilising the sanctioned unutilised BRNS fund differently.

3. The committee accepted the request of extending the project duration for one year.
4. The committee approved to utilise the unutilized grant of the project along with the interest earned out of it during the period of extension for a) Developing low energy negative ion implantation beam line b) Target preparation Laboratory. c) Equipment
5. It was authorised to utilise Travel grant money to support external users coming from Universities/ Colleges.
6. The committee approved the appointment of two JRF

During the period of report, the following publications were contributed:
