ACKNOWLEDGEMENT

First and foremost, I offer my sincerest gratitude to my supervisor, Dr. Archana Yadav, who has supported me throughout my research with her patience and knowledge whilst allowing me the room to work in my own way. I attribute the level of my Master's degree to her encouragement and effort and without her this work could not have been completed. One simply could not wish for a better or friendlier supervisor like her.

I am also grateful to the head of the department Dr. Sasmita Patel, each of whom has provided advice and guidance throughout the research process.

I would like to express my thanks to my parents who inspired to put in my best efforts for the research report. I would also like to thank all my fellow mates for their motivation and support which helped me to continue this journey and complete the dissertation work.
