INTRODUCTION

About the Company

Logicalloops is an exceptionally hybrid venture capital firm that is designed in a way to help entrepreneurs and startup to align their Ideation with real-world scenarios, provide them with insights of the current market with unaccustomed fabricated data leveraged with industry-leading deep tech machine learning technologies always to keep you ahead of market. Apart from seed Logicalloops also provides its in-house startups.

Some of the technologies we have involved with the product Python, Fast API, Mongo DB, Binance API , Ethereum Smart Contracts, Crypt API.

Vision

Our vision is to help entrepreneurs and startup to align their Ideation with real-world scenarios, provide them with insights of the current market with unaccustomed fabricated data leveraged with industry-leading deep tech machine learning technologies always to keep you ahead of market. We have a bias towards the founders and entrepreneurs who wants to develop the vision of an ecosystem rather than a single stander. To create products and services that can change lives.

Mission

Our mission is to enhance deliver market defining high quality solutions that create value and reliable competitive advantage . We started our journey after observing discrepancies in the existing system. So we adapted measures to make us the change that we wanted to see.
