ABSTRACT

This report encapsulates the essence of my Full Stack Developer internship at Presear Software Pvt. Ltd., spanning May to July 2023. It revolves around the development of a web application tailored for the Web 3.0 ecosystem. The internship immersed me in the world of decentralized content creation, governance, and community engagement. I integrated decentralized autonomous organization (DAO) protocols, deployed proposals, articles, grants, jobs, and a product showcase, all interfaced with REST APIs. These features reflect the evolving landscape of Web 3.0, emphasizing user-centric, decentralized, and collaborative paradigms.

This internship has been transformative, not only enhancing technical proficiency but also fostering adaptability and remote collaboration skills. It positioned me as a Full Stack Developer capable of navigating the ever-evolving digital landscape. This report offers an in-depth exploration of the challenges, accomplishments, and insights gained during the internship, providing a holistic view of the practical application of Full Stack Development skills in the dynamic realm of Web 3.0.
