

**A REPORT ON MECHANICAL, BIOLOGICAL AND CHEMICAL EFFLUENT
TREATMENT PLANT & WASTE WATER ANALYSIS**

Internship report submitted in partial fulfilment for the award of degree of

**VIZAG
STEEL**
Pride of Steel

**RINL VISAKHAPATNAM STEEL PLANT
SUBMITTED BY :**

VINOD YALAMARTHI-100017062

Under the Esteemed Guidance of

Shri.A.KRISHNARAO SIR

**In the partial fulfilment of project Internship for the award of degree of 4-Years of B-
Tech In CHEMICAL ENGINEERING**

GURU GHASIDAS VISHWAVIDYALAYA, BILASPUR, CHATTISGARH

BRIEF TABLE OF CONTENTS

Abstract

Chapter 0 Manufacturing of Steel and Iron

Chapter 1 Air Separation Process

- Introduction
- Process Overview
- Control of Cryogenic Air Separation Process
- Typical ASU features

Chapter 2 Compression House

- Suction Air filter
- Feed air compressor
- Lube oil system
- Nitrogen Compressor
- Oxygen Compressor

Chapter 3 Air Precooling System

- water charging to air pre cooling unit
- Air charging to pre cooling unit

Chapter 4 Air Purification Unit

- Air Contaminants
- Adsorption

Chapter 5 Heat Exchangers

- Plate-fin heat exchanger

Chapter 6 Booster Air Compressor

Chapter 7 Cryogenic Distillation

- MP Column
- LP Column
- Crude Argon Column

Chapter 8 Expansion Turbine

Chapter 9 Products Handling and Applications

- Storage Tanks
- Cryopumps
- Applications of the Products

Chapter 10 Quality Analysis

Conclusion

**RINL, VISAKHAPATNAM STEEL PLANT
VISAKHAPATNAM-530031, ANDHRA PRADESH
CO&CCP DEPARTMENT**

CERTIFICATION

**This is Certify that the summer project report entitled “A Report on
CRYOGENIC AIR SEPERATION THROUGH FRACTIONAL
DISTILLATION”.**

It is a Bonafide record of work done by

VINOD YALAMARTHI-100017062

**In partial fulfilment of the academic requirement for the award of B-
tech in Chemical Engineering During the Academic Year of 2022-
2023**
