Research Methodology : JMPBTT4 – Communication Research

Course Objectives

1. To impart the definitions and basic concepts of research and communication, elements of research importers and role communication research.
2. Students will learn the various types of research and methodology and tools for data collection.
research, social research and difference between communication research, media research.
3. To know the elements of research.
4. To impart the knowledge of basics of statistics and media metrics for analysis and report writing.

Unit I

Definition and Elements of Research, Scientific approach of research, Research and Communication theories, role of communication research, Importance of communication research – Indian scenario. Formulation of research problem, review of literature, hypothesis, research design.

Unit II

Qualitative and Quantitative Research Methods, Ethnography, Ethno methodology, Symbolic Interactionism, grounded Theory, Research Methods – census method, survey method, observation method, clinical studies, case studies, content analysis.

Unit III

Tools of Data Collection – observation, interview schedules, questionnaire, field studies, telephone surveys, online polls, focus groups. Sampling methods. Media research: evaluation, feedback, feed forward. Public opinion surveys – pre-election studies and exit polls, Attitude Measurement – Thurstone, Likert, Guttman, Reliability and Validity Measurements.

Unit IV

Data Analysis and Report writing: Data analysis techniques, coding and tabulation, Non-statistical methods- descriptive, historical. Statistical analysis – univariate, bi-variate, multi – variate tests of significance, central tendency, preparation of research reports/project reports/dissertations, Referencing and Citation Style. Ethical perspectives of communication research.

Course Outcomes

1. Students would understand basic concepts, definitions of research and communication, element and their role of communication research.
2. Students would know the difference between communication research, media research and social research.
3. Students would gain the knowledge about various types of research methodology and tools for data collection.
4. Students will have the knowledge of basics of statistics and media metrics for analysis and report writing.

DISSERTATION / PROJECT –JMPDD1- DISSERTATION/ PROJECT & VIVA-VOCE

Course Objectives

1. To develop skill competencies specific to an occupation or profession.
2. To expand oral and written communication skills.
3. To learn cultures and to work effectively within diverse environments.
4. To acquire additional interpersonal communication and interaction skills.

Every student will have to prepare a dissertation/project in any area of Journalism and Mass communication detailed in the curriculum under the guidance of faculty member. The objective of the exercise is to enable a student to have an in-depth knowledge of the subject of his/her choice. It should be a research based effort and should endeavour to create new knowledge in any area of Journalism and Mass Communication. The guide(s) to supervise such dissertation/project will be appointed by the Head of the Department from among the faculty members of the Department. The guide(s) should certify that the dissertation/project is based on the work carried out by the candidate. Three copies of the dissertation/project should be submitted to the Head of the Department within clear 15 days (including holidays) before commencement of the Fourth Semester examination for onward transmission to the Controller of Examination. The students at their own cost should carryout preparation of the dissertation/project. The dissertation/project will be evaluated both by the internal and external examiners and marks shall be communicated to the Controller of the Examination through the Head of the Department.

Course outcomes:

1. After successful completion, students will have the knowledge and skills to: plan, and engage in, an independent and sustained critical investigation and evaluation of a chosen research topic relevant to environment and society systematically identify relevant theory and concepts, relate these to appropriate methodologies and evidence, apply appropriate techniques and draw appropriate conclusions.
2. The students will learn to apply qualitative and/or quantitative evaluation processes to original data.
3. The students will understand and apply ethical standards of conduct in the collection and evaluation of data and other resources.
4. The students would learn the competencies specific to an occupation or profession and the cultures to work effectively within diverse environments.
