CHAPTER - 1

INTRODUCTION

This study on Evaluation on information services. Communication of knowledge & has become very important for growth and development of modern society. Knowledge itself has become very complex. It is difficult for my individual to be aware of all the developments in his own field without the help of libraries.

Information today is considered to be one of the most vital resources for success and development. In a highly competitive modern world, knowledge of the new developments in the field in which one chooses to be active has become one of the prerequisites for success. Hence, it has become imperative for people working in various capacities, involved in various activities and professions to update their knowledge to take right decision at the right time

The University library is an essential part of educational life and one I can hardly visualize any kind of socio - economic development and rise in qualitative life without the aid of adequate library facilities, especially in the education environment. Information Sources and services play a very important role to meet the needs of the user community. They need and depend on various sources and services of the library organizations.

About Study Area

I will selected Dr. Shivdulare Mishra central library bilaspur for our research study. Dr. Shivdulare Mishra central library is first central library in bilaspur. It was supported and established by central govt of India in the Scheme of Smart City Project. It was inaugurated by chief minister of Chhattisgarh Shri Bhupesh Baghel in 3rd January 2021. Dr. Shivdulare Mishra central library situated in Nutan Chouk Sarkanda Bilaspur Chhattisgarh.

Two years ago, the state Chief Minister Bhupesh Baghel named the newly constructed Central Library in Sarkanda area as Dr. Shivdulare Mishra Library. By naming the Central Library after Dr. Shivdulare Mishra, the coming generations will always remember him for awakening the flame of independence in Bilaspur and playing a major role in the freedom struggle. Dr. Shivdulare Mishra first MLA of Bilaspur after the independence of the country.

The basic objective of a Dr. Shivdulare Mishra central library is to provide information to the general public to satisfy their informative, educational and recreational needs. The explosive growth of knowledge and the direct relation of information to development in all walks of human life have elevated Public Libraries as important centers which can undertake vast and varied functions for development.

Chapter-1

Introduction: Information needs & seeking behaviour of C.M. Dubey Post Graduate College Bilaspur.

Information has always been a component of social development and improvement in living standards from the primitive times. It plays an important role in economic, political, social, occupational, cultural and other sectors of development and to bring social reforms. Any worthwhile decision cannot be taken on any topic without proper and complete information on that specific topic. In fact, socioeconomic progress is impossible without decision support information from various sources.

The information need of the users may be related to their Educational Activities, Research Activities, Professional Activities, Recreational Activities, and Cultural Activities or to Personal Development. It is important that 'needs' is not mistaken with 'demand'.

Digital information is one of the powerful / effective tool or technology ever produced for getting information from any part of the world easily. Internet has been described as a system for following computer to digital material with each other. It is used by millions of people throughout the world for accessing digital resources, eLearning, e- Newspaper, e-Books, communication, business, research, recreation and to browse information for various needs. Like printed resources use in traditional libraries to generate services by the library staff, the digital resources are used to generate services using software driven web-based interfaces. Computer programs substitute for intellectually demanding tasks that are usually carried out by skilled professionals. Activities that require considerable mental activities, like the reference service cataloguing and indexing, seeking information, etc.

Purpose of the study

This research study is conducted to determine the information seeking behaviour and use of information resource by the faculties of C.M. Dubey Post Graduate College Bilaspur.

The overall purposes of the study are primarily to identify the users' perceptions of library resources and their expectations from the services. It is essential to conduct occasional surveys to compare ourselves with other institutions serving in the respective field for quality improvement. Focus is given to the following assessment dynamics:

- Needs or priorities of the library users
- Service quality assessment and necessity for its enhancements
- Frequency, patterns, and comfort levels of users
- User satisfaction with available materials, services and Online contents

Abstract

The study entitled “ perception and use of open access journals for scholarly communication in life science: a study in Guru Ghasidas University”. In this study all the related terms to this study are defined in a good way. For the study review of various literature related to research work is done from Sodhganga , internet etc. The various departments of life science are chosen of the guru ghasidas university for this study like anthropology, botany , biotechnology and zoology. This study defines the use of open access journals for the scholarly work .

A well designed methodology is adopted for the study. For the data collection a structured questionnaire is prepared and shared to the target population of life science through online mode. The questionnaire is prepared in google form. Target population were the PG students and PhD scholars of the life science of the university. Data analysis is done done through google form and other suitable methods are used for data analysis. In the end recommendations and suggestions are given.

ABSTRACT

Computing technology, communication technology, and mass storage technology are some of the areas of continuous development that reshape the way libraries access, retrieve, store, manipulate, and disseminate information to users. ICT has impacted on every sphere of academic library activity especially in the form of the library collection development strategies, library building and consortia. Information and Communication Technology (ICT) has brought unprecedented changes and transformation to academic library and information services, conventional LIS such as OPAC, user services, reference service, bibliographic services, current awareness services, document delivery, interlibrary loan, audio visual services, and customer relations can be provided more efficiently and effectively using ICT, as they offer convenient time, place, cost effectiveness, faster and most-up-to-date dissemination and end users involvement in the library and information services process. The impact of ICT characterized on information services by changes in format, content and method of production, and delivery of information products. Emergence of the Internet as the largest repository of information and knowledge, changed role of library and information science professionals from intermediary to facilitator, new tools for dissemination of information and shift from physical to virtual services environment and extinction of some conventional information services and emergence of new and innovation web based.

NAME:

INTRODUCTION

An overview of the analysis is given in this chapter; it starts with the review of the research context and follows with a proposed hypothesis and a description of the problem statement. The chapter formulated a list of research objectives and questions, which were carefully adumbrated and attempts to justify the outcome of the study. Then the chapter offers a brief description of the significance and limitations of the research. Finally, it concludes with a list of the definition of the terms used in the research.

BACKGROUND TO THE STUDY

This study evaluates the information resources, services and facilities in Kamla Nehru College Korba in relation to the availability, accessibility, utilization, satisfaction and constraints associated with the usage of resources, programs and facilities for information by staff, undergraduate and post graduate students in the Kamla Nehru College Korba. The chapter presents the background on the information resources, services and facilities. It further explains the problems and outcomes The Science Analysis.

The main purpose of evaluating the resources, programs and facilities for information in Kamla Nehru College Korba is to take into consideration the benefits of users and raise the standards of the existing information resources, services and facilities. Hence it is an unimportant exercise unless conducted with specific objectives in mind to identify The types of available information resources, services and facilities, the extent to which information resources, services and facilities are accessible, the extent to which information resources, services and facilities are used and the extent to which library users are satisfied with information resources are determine, services and facilities and suggest some measures to improve utilization User satisfaction and frustration with information resources,

INTRODUCTION

Collection Development is a systematic process of building library collection for the satisfaction of the user. It is a broad concept deals with many activities like selection of materials, policy formulation, acquisition, evaluation and weeding of library collection.

Library collection refers to the overall collection of library materials, books, manuscripts, serials, governments documents, pamphlets, catalogues, reports etc. that make up the holding of a particular library. Collection development is considered as similar as collection building but Collection development is different from collection building as the word development implies qualitative improvement of the collection. It is therefore means building up and improving the collection in the library.

Collection development is mean by which library provide high quality information resources of print and non-print material and provide access to e-resources. It is an ongoing process, undertaken by library with input from faculty, students, staff and researchers.

It serves the varied needs of the users such as studying, research, teaching, recreational and so on. For planning effective collection development of library, it is essential to frame an exhaustive collection development policy.

Purpose

- to meet users need timely and in economic manner
- selecting best and useful documents

Abstract

The 21st century has borne witness to an unprecedented wave of digitalization, fundamentally altering the way we live, work, and interact. This report delves into the multifaceted impact of digitalization on individuals, businesses, governments, and society as a whole. It examines the driving forces, challenges, opportunities, and ethical considerations associated with this digital transformation. Through empirical research, case studies, and theoretical analysis, this report provides a comprehensive understanding of the profound changes ushered in by digitalization and offers insights into its implications for the future.
