R.M
Research Methodology

Course Objective:

The course begins with the understanding & foundations of Research, and covers the issues concerning the Research Process, Formulation of the Research Problem, Literature Survey, Working Hypothesis and concepts & importance of Research Design and Values in Research.

Course Learning Outcomes

The course imparts skills to undertake data based research. The student enrolling in this course would develop competency in executing sample surveys and would have reasonable exposure to conduct a Research Study.

Unit 1

Foundations of Research: Meaning of Research, objectives of research, Types of Research, Research Approaches, Significance of Research, and Research Methods versus Methodology.
(12 Classes)

Unit 2

Research Process, Formulating the Research Problem, Literature Survey, Development of working Hypothesis, Preparing the Research Design, Determining Sample Design. Execution of the Project, Analysis of Data, Generalization and Interpretation, Preparation of the Report.
(12 Classes)

Unit 3

Research Design: Meaning of Research Design, Need for Research Design, Different Research Designs- Exploratory Research Design, Descriptive Research Design, Concept of population, sample, sampling frame, Parameter. Statistic.
(12 Classes)

(12 Classes)

RKS
4
94

Unit 4

Hypothesis: Definition, null hypothesis and alternative hypothesis, hypothesis Testing- Type I and Type II error, Sampling distribution, standard error-utility of standard error, sampling error. (12 Classes)

Unit 5

Values in Research – Publication Ethics, lessons from the lives and teachings of great leaders (Mahatma Gandhi- Father of Nation), role of family, society and educational institutions in inculcating values.

DSE-I

Quantitative Methods

Course Outcomes:

Provides students with quantitative skills that are required to make business decisions. These skills involve using forecasting and mathematical techniques. Formulation and application of mathematical models in business decision making scenarios. Outline quantitative models to decision making and problem analysis, and their interpretations in transportation problems and game theory.

Unit 1

Rules of differentiation; Interpretation of revenue, cost, demand, supply functions; Elasticities; (10 Classes)

Unit 2

Rules of partial differentiation and its application in Economics: Problems of maxima and minima, Simple problems in market equilibrium; Concept of integration; Simple rules of integration; Application to consumer's surplus and producer's surplus; (15 Classes)

Unit 3

Concept of matrix — their types, simple operations on matrices, matrix inversion and rank of a matrix; Determinants and their basic properties; Solution of simultaneous equations through Cramer's rule;

Unit 4

(10 Classes)

Linear programming: Basic concept; Formulation of a linear programming problem — Its structure and variables; Nature of feasible and optimal solution; Solution of linear programming through graphical method; Concept of duality

(15 Classes)

Unit 5

Game Theory: Strategies — simple and mixed (2X2); Saddle point solution; Value of a game;

(10 Classes)

DSE-2
ECONOMETRICS-I

Objective: *Econometrics is a tool to judge the role of economic variables in the economic development.*

1. Origin and development of Indian Knowledge System with reference to this paper. Quantitative & Qualitative Analysis, Meaning and Methodology of Econometrics, Basics of Two-Variable Regression Analysis. OLS Estimation and Hypothesis Testing.
2. Multiple Regression Model, Estimation and Inference. Assumption of Classical Linear Regression Model (CLRM)
3. Nature, Consequences, Detection and Remedial Measures of Multi Collinearity, Heteroscedasticity and Autocorrelation (Durbin-Watson Test).
4. Regression on Dummy Variable, Dynamic Econometrics Models: Autoregressive and Distributed Lag Models-Koyek Approach.
5. Time Series Analysis : Introduction, economic Time Series : Stationary and Non-Stationary.

BASIC READING LIST

1. Amemiya, T. (1985), Advanced Econometrics, Harvard University Press, Cambridge, Mass.
2. Baltagi, B.H. (1998), Econometrics, Springer, New York.
3. Dongherty, C. (1992), Introduction to Econometrics, Oxford University Press, New York.

SEMESTER-IV

Paper	Semester-IV	Credits
DSE-3	Data Analysis / Demography	4L + 1T = 5
DSE-4	International Economics-II/ Public Finance	4L + 1T = 5
DSE-5	Econometrics-II/Gandhian Economics-II	4L + 1T = 5
Dissertation	Dissertation/Presentation	4D + 2P = 6

DSE-3

Data Analysis

Unit 1

Importance of Statistics in Economics, Collection of data, Primary and Secondary Sources of Data, Methods of collection of Primary Data- questionnaire, schedule, Observation and interview method.

Unit 2

Probability & Non Probability Sampling-Random Sampling, Purposive or Deliberate Sampling, Stratified or Mixed Sampling, Systematic Sampling, Quota Sampling, Convenience Sampling etc.

Unit 3

Classification and Tabulation of Data

Unit 4

Diagrammatic Representation of Data: Bar Diagrammes-Simple Bar Diagramme, Multiple Bar Diagramme, Differential Bar Diagramme, Pie or Circular Diagram.

Unit 5

Tests of Hypothesis: Student's t-tests, F-test.

DSE-5
ECONOMETRICS - II

Objective: To develop the mathematical, statistical and analytical approach in the economics with the help of econometrics.

1. Regression Analysis and F-Test (Analysis of variance) One way, two way.
2. Matrix Approach to Linear Regression Model. Assumptions, OLS Estimation and their properties. Interpretation of Results.
3. Autoregressive Model: The Adaptive Expectation Model, Partial Adjustment Model, The Almon Approach to Distributed Lag Model.
4. Chow Test: Test of equality between coefficient's, Application of LRM for estimation of Growth rate, demand function, production function.
5. Simultaneous Equation Model (SEM) : The method of Indirect Least Square and Two Stage Least Square Methods (Assumptions & Properties)
