EXPERIENCE LETTER

To Whomsoever It May Concern

Date: 10-07-2024

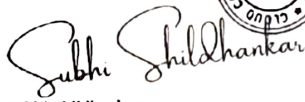

This letter is to certify that **Abhishek Kumar** has successfully completed internship with **Cloud Counselage Pvt. Ltd.** as **Web Development Intern** for **6 weeks** starting from **15 May 2024** to **30 June 2024**.

During this engagement, **Abhishek** has abided by the company policies, attended various industry-specific training sessions, and successfully submitted the required project deliverables by following the best practices and project management practices.

Throughout the internship **Abhishek** has worked ethically, followed the instructions, performed necessary research, and worked with minimum supervision. The delivery of the project demonstrates their domain knowledge and skills, a structured approach to problem solving, ability to follow instructions, and inclination to work hard.

This association has been beneficial for us, and we wish **Abhishek** all the success in their future endeavours.

For CLOUD COUNSELAGE PVT. LTD.,

About the company

Cloud counselage is an innovative online platform that serves as a dynamic and comprehensive resource for aspiring and experienced developers alike. Founded by Tushar topale and Subhi shildhankar in 2015, it has quickly gained recognition in the tech community for its commitment to providing a rich learning environment that covers a wide spectrum of programming languages, web development, and other technology-related topics. With a mission to make coding education accessible, engaging, and practical, Coursera offers a range of features and courses to cater to the needs of its growing user base. Cloud counselage flagship feature is its hands-on coding environment. Unlike many online learning platforms, Cloud counselage allows users to write and test code directly in their web browser, eliminating the need for complex setup or installations. This interactive coding experience is invaluable for beginners and experts alike, providing a sandbox to experiment, learn, and develop their coding skills in real-time. Users can practice and apply what they learn immediately, cementing their knowledge through practical exercises.

Cloud counselage covers a diverse array of programming languages and technologies, ensuring that learners have the flexibility to explore their specific interests. From web development technologies like HTML, CSS, JavaScript, and React to back-end technologies like Node.js and databases, the platform's cloud counselage and coding challenges are designed to accommodate both front-end and back-end developers. Additionally, Cloud counselage delves into data science, machine learning, and other advanced topics, offering a pathway for users to expand their horizons and stay up-to-date with emerging trends in the tech industry.

The platform offers structured courses that cater to users of all skill levels. Beginners can start with foundational courses, such as "Introduction to HTML and CSS," which provide step-by-step tutorials and hands-on exercises to build a strong coding foundation. More experienced developers can dive into more advanced topics, with courses like "Building Real-World Projects with React" or "REST API Development with Node.js." Each course includes a combination of video lectures, code examples, quizzes, and coding challenges, ensuring a well-rounded learning experience.
